Allowable Subject Matter

- 2. Claims 1-58 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: none of the prior art of the record discloses or suggests a method for initiating communication between a first modem and a second modem, the method comprising the steps of: applying at a first modem a predetermined algorithm to dynamically generate a sequence of samples representing an analog answer tone signal; encoding at the first modem the samples of the sequence, to generate a sequence of codewords; and providing the sequence of codewords for transmission to the second modem, whereby the second modem may receive the codewords of the sequence and interpret the sequence of codewords to represent an analog answer tone signal as recited in claims 1, 44, 49.

Claim 16, none of the prior art of the record discloses or suggests a method for starting communication between a first modem and a second modem, the method comprising the steps of: for each received sample, (i) applying a predetermined algorithm to dynamically generate a corresponding expected sample, (ii) comparing the expected sample to the received sample, and (iii) computing an error between the expected sample and the received sample; comparing an overall error value using the

computed error value between the expected samples and the received samples; and if the overall error value is less than a predetermined threshold value, deciding to perform the shortened training sequence, whereby the shortened training sequence may then be performed.

Claim 30, none of the prior art of the record discloses or suggests a network device employing a training sequence to start communication, the network comprising: a first set of machine language instructions stored in the data storage medium and executable the processor to dynamically generate a first set of codewords representing an analog answer tone signal.

Claims 56-58, none of the prior art of the record discloses or suggests a method comprising the steps of: generating a sequence of sample values by applying an algorithm comprising:

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
